How to Change the Goliath Performance Monitor Server IP Address

The steps below walk you through changing the Goliath Performance Monitor Server IP address. This comes in handy when the Server hosting the application is moved or IP address is changed.

This is broken down into two steps;

- Changing the Server IP address
- Updating the Goliath Agent with new IP

Changing the GPM Server IP Address

1. From the install directory of MonitorIT (usually c:\program files (x86)\Monitorit) go to the 'Bin' directory
2. Run the utility 'MonitorITCFU.exe' (Run as Administrator)
3. Go to File > Open and choose 'default.btc'
4. Edit the 'Server IP Addr' to the new IP address or FQDN
5. Choose File > Save and then close
6. Go to Windows Services and restart 'MonitorIT Server Service'
7. Open MonitorIT by clicking on the desktop link or opening the browser to <http://localhost> or <http://HostIPAddress>. Include ': port number' if using web port other than 80 for example <http://HostIPAddress:81>.

Updating the GPM Agent with the new IP

Updating From Registry

1. Log into the Goliath Server
2. Go to Windows Services and stop the 'MonitorIT Agent Service'
3. Open registry editor by typing 'regedit' into the run or search box.
4. Navigate to 'HKEY_LOCAL_MACHINE\SOFTWARE\Breakout Technologies\MonitorIT\Agent' for 32bit OS or 'HKEY_LOCAL_MACHINE\SOFTWARE\Wow6432Node\Breakout Technologies\MonitorIT\Agent' for a 64bit OS.
5. Edit the 'ServerAddr' to the new IP address or FQDN then exit registry
6. Go to Windows Services and start the 'MonitorIT Agent Service'
